Thank you joining us!

See you in Prague in 2026

Thank you very much for a very successful meeting which was scientifically fruitful with high quality presentations and discussions. Top speakers scientists and physicians as well as young generation speakers were presented with nice balance and this undoubtedly will stimulate further research.

Many thanks again for organizing an outstanding Autoimmunity congress in Ljubljana! Receiving several compliments from colleagues from around the world about brilliant presentations, stimulating discussions and excellent organization.

What an interesting, well planned and perfectly orchestrated Conference!

Congratulations! I learned a lot listening to the talks and it was also nice to meet people personally - albeit shortly – whom I only knew from the Friday Meetings.

In the name of me and my students who joined the wonderful congress in Ljubljana we want to thank you from the bottom of our hearts for the continuous support and for this great opportunity to meet all the leading experts we had the chance to meet.

Thank you very much for organizing such an amazing Autoimmunity Congress! I like the format of Autoimmunity, which mixes clinical and translational research and diagnostics. It gives the participants a wide view of what is happening! It is the only meeting with this format.

I was very pleased with the diversity and quality of the lectures. I learned a lot and had opportunity of meeting colleagues and strengthen networks. Thanks for the organization and for the kind invitation to participate.

It was great to participate at such interesting and inspiring meeting! Several people and groups approached me and asked for collaboration. And of course, I learned a lot.

Thank you very much and congratulations for the wonderful Autoimmunity Congress. All my fellows enjoyed the meeting. Now it is the turn of CORA!

EMPOWERING CHANGE THROUGH COLLABORATION

Why attend

The 14th International Congress on Autoimmunity is heading to Ljubljana. Join us in person to learn, grow and network with

renowned professionals. We will discuss the newest therapeutic techniques and diagnostic tools as well as the most up-to-date research and novel therapies of autoimmune diseases.

[LEARN MORE](#)
